Operational Readiness Support - IATA Liaison desk

Coordination on ATS impact

- Proactive (before a contingency could be expected)
 - What measures might be in place, when, restrictions, etc.
- During the contingency (what to expect for better airline operational planning)
 - Ex. NOTAMs that were changed last minute without previous information
- Explore different options in coordination with stakeholders (airlines and others) when a contingency is affecting the normal operation.
 - ATM or CNS outage; how to avoid the restriction, is it affecting the whole airspace or just a portion of it, etc..

Advancing communication once a CERT is activated

- IATA Tactical Operational Portal (ITOP) stakeholders' outreach as a mechanism
