MEDEVAC FLIGHT TO MANKIEN.
CRITICAL MISSION IN THE HEART OF
SOUTH SUDAN'S SWAMPS

The ICRC doctor performed a point-of-care ultrasound (POCUS) in the ambulance (Land Cruiser) on Deng* (*Name has been changed), a patient with difficulty breathing

The patient showed significant improvement on the way back to Juba and was able to begin Positive Expiratory Pressure (PEP) therapy using an improvised setup with a half-filled water bottle and an NG tube.
